1. The affidavit under 37 CFR 1.132 filed 9/12/06 is sufficient to overcome 103 rejections based upon Rudy and Rudy in view of Verhoff.
2. The following is an examiner's statement of reasons for allowance: the case of prima facie obviousness was based upon one expecting superior grinding results of a multi-carbide in a media mill. The case of obviousness, however, did not properly consider the expected detrimental effects from the use of such an ultra-hard material in media milling. One of skill in the art at the time of invention would have expected ultra-hard multi-carbide grinding bodies to not only damage the milling apparatus, but also to damage each other upon collision in the mill since a particle possess the hardness to wear a like particle, thus creating contamination of the product and high maintenance costs. These expected negative effects did not occur, however, and the applicant is able to mill with superior results using multi-carbide grinding media.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

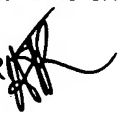

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- The title is changed to: "Multi-carbide material and use as grinding media"

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stuart Hendrickson whose telephone number is 571-272-1351. The examiner can normally be reached on 8-4 M-F.
